The Battle of Berlin raged from 1942 until March 1944, when Bomber Harris conceded that his area bombing strategy, the only strategy left open to him at the time, just was not working. Where the strategy had succeeded in the Battle of the Ruhr and against Hamburg, Berlin posed to great a challenge not least because of the limited range of our own fighter support, the imprecision of the much longer range night operations to Berlin and the German air defences protecting their capital.

Bomber Command Losses - France & BeNeLux

Cranwellian names in plain text have been verified between College and IBCC database lists
Cranwellian names in *italics* are believed to be the correct matches to corresponding surnames and initials in the official IBCC database

LOST OVER FRANCE

Casualty	Decorations	Entry	Description	Date
Stokes NG		SFTS23	KIA 97 Sqn; Manchester I R5795 OF-W; Coningsby-Brest; attack on Gneisenau; shot down by Me 109s.	18/12/41
Tindall A		SFTS9	KIA 115 Sqn; Wellington IC T2520 KO-A; Marham-Bordeaux; off-course RTB, flew into high gnd Tredegar.	9/12/40

Manchester I 97 Sqn

Stokes NG

Tindall A

Wellington IC 115 Sqn

Gneisenau and Scharnhorst operated together for much of the early portion of World War II, including sorties into the Atlantic to raid British merchant shipping. After a successful raid in the Atlantic in 1941, Gneisenau and her sister put in at Brest, France. They were subjected to persistent raids by Bomber Command from March 1941 until they made a partially successful break for Norway in the infamous "Channel Dash" of February 1942. Gneisenau went into dry dock and was bombed 26/27 February, never to sail again.

On 8/9 December, 44 RAF aircraft were sent to Bordeaux, including 29 Wellingtons of the 49, 115 and 149 Squadrons, and 15 Whitleys from 4 Group. The target was the city itself and more specifically the Italian submarine base at Bacalan. The bombardment lasted over 5 hours and most of the bombs fell about 2500 to 3000 meters from the base toward the centre of the city. The only RAF loss was Tindall and his crew.

Marshall CD

Murphy AM

Mosquito VI 23 Sqn

We have been unable to find specific details on the intruder sortie to Namur to drop leaflets. However, intruder sorties were generally incursions into enemy airspace to disrupt their operations. Reference to leaflets here is difficult to explain, but sometimes they were used to forewarn local inhabitants on impending raids.

In 1943, Luftwaffe night fighters were causing serious losses attacking bomber streams over Germany. 100 Group was formed and commenced operations on 8 November 1943.

Bomber Command Losses - Norway

Cranwellian names in plain text have been verified between College and IBCC database lists

Macleod JB		SFTS24	KIA 110 Sqn; Blenheim IV V6429 VE-; Lossiemouth-commando ops; shot down Norway coast.	27/12/41

Kaby N
Macleod JB

Blenheim IV 110 Sqn

The raid on the Norwegian islands of Vaagso and Maaloy, codenamed Operation Archery, broke new ground for combined operations. It was the first time air support was integrated into the raiding plans from the outset.

The commando force of 570 troops was divided into five parties to:

1. Secure the area north of the town of Måløy in South Vågsøy and to engage any enemy reinforcements
2. Subdue and secure Måløy town
3. Eliminate the enemy on Måløy Island which dominated the town
4. Eliminate the enemy strongpoint at Holvik west of Måløy
5. Provide a floating reserve offshore

Central to the operation was the destruction of fish-oil production and stores which the Germans used in the manufacture of high explosives. Another intention was to cause the Germans to maintain and increase forces in Norway, which would reduce forces deployed on the Eastern Front, thereby giving a numerical advantage to Allied forces.

No Royal Navy ships were lost, but the RN suffered four men killed and four wounded. The Commandos sustained 17 killed and 53 wounded. The commander of the Norwegian Armed Forces in exile, Captain Martin Linge, was killed in an attack on the local German headquarters and eight RAF aircraft were shot down. (A Norwegian civilian was killed during the raid, possibly by shrapnel). The commandos accounted for at least 120 defenders killed and returned with 98 prisoners and a complete copy of the German Naval Code. Captain O'Flaherty was hit by sniper fire and lost an eye, later wearing an eye-patch when a brigadier. Several Quislings and over 70 loyal Norwegians were also brought back. In conjunction with this raid, Operation Anklet was mounted by No. 12 Commando on the Lofoten Islands, as a diversion. The raid was enough to persuade Adolf Hitler to divert 30,000 troops to Norway and to build more coastal and inland defences. Hitler thought that the British might invade northern Norway to put pressure on Sweden and Finland.

Eight aircraft were lost including the two Blenheim aircraft flown by SFTS trained Cranwellians.

Bomber Command Losses - SOE Support

Cranwellian names in plain text have been verified between College and IBCC database lists

Casualty	Decorations	Entry	Description	Date
Butler AC		SFTS43	KIA 138 Sqn; Stirling IV LK143 NF-B; Tempsford-SOE Opn Tablejam 169/177; lost without trace Denmark.	3/12/44

Butler AC

Stirling IV LK149 138 Sqn

Stirling IV LK143 lost without trace 3/12-1944

The aircraft belonged to 138 Sqn and was coded NF-B
T/O Tempsford 00:35* OP: Tablejam 169 & 177 in Denmark

The Stirling took off on a mission to drop supplies to the Danish resistance movement at Tablejam 169 which was located 9½ km N of Kolind / 6 1/4 km S of Fjellerup and Tablejam 177 which was located 15½ km NE of Randers / 5 km N of Mellerup. The aircraft carried 12 containers and 1 package for each drop zone.

The crew were: Pilot F/O George Frederick Nichols, Flight Engineer Sgt Arthur Cecil "Taffy" Butler, F/S Joseph Albert Golding, F/S John George Harris, F/S Leslie William Poulson RAAF, Sgt Frederick Albert Walter Filer and Air Gunner F/S Charles Edward Terrell.

A report from the Danish resistance stated that the aircraft did not reach any of the dropzones and that they had no news whatsoever about it.

The aircraft was lost without trace and the crew is commemorated at the Runnymede Memorial in the United Kingdom.
In German files it is recorded that Oberfeldwebel Herbert Giesecke of 3./ NJG 3 claimed a Stirling in Planquadrat MQ-19 at 04:49 hrs. The Stirling was flying at 30 meters when shot down. (It was quite normal for aircraft of 138 and 161 Squadron to drop to that height when approaching the Danish coast to avoid being picked up on radar).

The primary task of Coastal Command was to protect convoys from the German *Kriegsmarine's* U-boat force. It also protected Allied shipping from the aerial threat posed by the *Luftwaffe*. The main operations of Coastal Command were defensive, defending supplies lines in the various theatres of war, most notably the battle of the Atlantic. A limited number of detachments served in the Mediterranean, Middle East and African theatres under the Command from 1941, operating from a headquarters in Gibraltar. Coastal Command squadrons operated from bases in the UK, Iceland, Gibraltar, the Soviet Union, West Africa and North Africa. Coastal Command also served in an offensive capacity. By 1943 Coastal Command finally received the recognition it needed and its operations proved decisive in the victory over the U-boats.

Prior to the establishment of the Desert Air Force (DAF), several RAF formations operated in North Africa. On 3 September 1939, RAF Middle East Command —under Air Chief Marshal Sir William Mitchell, Air Officer Commanding-in-Chief Middle East - comprised four separate groups: Egypt (designated Middle East), RAF Iraq, Mediterranean at Malta, and RAF Aden (8, 203, and 94 Squadrons). Mitchell handed over to Air Vice Marshal Sir Arthur Longmore (RAF College Commandant 1929-1933) in early May 1940. When Italy declared war in June 1940, Longmore had just 29 squadrons numbering less than 300 aircraft in the four groups detailed above.

The DAF, also known chronologically as Air Headquarters Western Desert, Air Headquarters Libya, the Western Desert Air Force, and the First Tactical Air Force (1TAF), was an Allied tactical air force created from No. 204 Group RAF under RAF Middle East Command in North Africa in 1941, to provide close air support to the British Eighth Army against Axis forces. Throughout World War II, the DAF was made up of squadrons from the RAF, the South African Air Force (SAAF), the Royal Australian Air Force (RAAF), the United States Army Air Forces (USAAF) and other Allied air forces.

In October 1941, the Western DAF had 16 squadrons of aircraft (nine fighter, six medium bomber and one tactical reconnaissance) and fielded approximately 1,000 combat aircraft by late 1941. By the time of the Second Battle of El Alamein, the DAF fielded 29 squadrons (including nine South African and three USAAF units) flying Boston, Baltimore and Mitchell medium bombers; Hurricane, Kittyhawk, Tomahawk, Warhawk and Spitfire fighters and fighter-bombers. There were over 1,500 combat aircraft, more than double the number of aircraft the Axis could field.

Hugh Gordon MALCOLM VC

Born at Broughty Ferry, Dundee, Malcolm entered the Royal Air Force College Cranwell on 9 January 1936.

In January 1938 he joined 26 (Army Co-operation) squadron at Catterick. In May 1939 he suffered a serious head injury in a Westland Lysander crash. When the war started Malcolm was serving with No 17 Training Group.

On 4 March 1941 he was promoted to Flight Lieutenant and was Air Liaison officer on General Bernard Montgomery's general staff.

By the end of 1941 he had risen to the rank of Squadron Leader and joined No 18 Squadron as a flight commander, flying the Bristol Blenheim based in Suffolk, UK.

Wing Commander
Hugh Gordon MALCOLM
Officer Commanding 18 Sqn
(b. 02/05/1917 Dundee, Scotland.
d. 04/12/1942 Chougui, Tunisia.)

TUESDAY, 27 APRIL, 1943

Air Ministry, 27th April, 1943.

ROYAL AIR FORCE.

The KING has been graciously pleased to confer the VICTORIA CROSS on the under-mentioned officer in recognition of most conspicuous bravery:—

Acting Wing Commander Hugh Gordon MALCOLM (33322) (deceased), No. 18 Squadron.

This officer commanded a squadron of light bombers in North Africa. Throughout his service in that theatre his leadership, skill and daring were of the highest order.

On 17th November, 1942, he was detailed to carry out a low-level formation attack on Bizerta airfield, taking advantage of cloud cover. Twenty miles from the target the sky became clear, but Wing Commander Malcolm carried on, knowing well the danger of proceeding without a fighter escort. Despite fierce opposition, all bombs were dropped within the airfield perimeter. A Junkers 52 and a Messerschmitt 109 were shot down; many dispersed enemy aircraft were raked by machine gun fire. Weather conditions became extremely unfavourable and as a result, two of his aircraft were lost by collision; another was forced down by enemy fighters. It was due to this officer's skilful and resolute leadership that the remaining aircraft returned safely to base.

On 28th November, 1942, he again led his squadron against Bizerta airfield which was bombed from a low altitude. The airfield on this occasion was heavily defended and intense and accurate anti-aircraft fire was met. Nevertheless, after his squadron had released their bombs, Wing Commander Malcolm led them back again and again to attack the airfield with machine gun fire.

These were typical of every sortie undertaken by this gallant officer; each attack was pressed to an effective conclusion how-

ever difficult the task and however formidable the opposition.

Finally, on 4th December, 1942, Wing Commander Malcolm, having been detailed to give close support to the First Army, received an urgent request to attack an enemy fighter airfield near Chougui. Wing Commander Malcolm knew that to attack such an objective without a fighter escort—which could not be arranged in the time available—would be to court almost certain disaster; but believing the attack to be necessary for the success of the Army's operations, his duty was clear. He decided to attack. He took off with his squadron and reached the target unmolested, but when he had successfully attacked it, his squadron was intercepted by an overwhelming force of enemy fighters. Wing Commander Malcolm fought back, controlling his hard-pressed squadron and attempting to maintain formation. One by one his aircraft were shot down until only his own aircraft remained. In the end he, too, was shot down in flames.

Wing Commander Malcolm's last exploit was the finest example of the valour and unswerving devotion to duty which he constantly displayed.

Air Ministry, 27th April, 1943.

ROYAL AIR FORCE.

The KING has been graciously pleased to approve the following awards in recognition of gallantry displayed in flying operations against the enemy:—

Second Bar to Distinguished Flying Cross.

Acting Squadron Leader Lance WARD, D.F.C. (68717), Royal Air Force Volunteer Reserve, No. 145 Squadron.

This officer is the leader of a squadron which has achieved much success in recent operations. During March, 1943, the squadron destroyed 21 enemy aircraft, 4 of which were shot down by Squadron Leader Ward. By his great skill and daring, this officer has contributed materially to the high standard of operational efficiency of the squadron he commands. Squadron Leader Ward has destroyed 19 enemy aircraft.
